**VI. Read the following passage and decide whether each of the statements is TRUE or FALSE.**

Self-driving vehicles can drive themselves without human control. Those vehicles use sensors and software to control themselves. Sensors, like radars, are used to create a map of the surroundings. Then they send information to the software. The software processes the information and sends instructions to the vehicle's "actuators". The actuators drive the cars. The software also makes sure that the cars follow traffic rules and can handle obstacles in their paths. The technology is still under development.

26. Sensors and software are two important parts of self-driving vehicles.
27. Sensors are compared with radars.
28. The actuators receive information from the sensors.
29. Self-driving cars can avoid obstacles.
30. So far, there hasn't been a fully self-driving vehicle.
