20. Close international _____ is needed to fight against all forms of racism. (COOPERATE)

Read a text about the future of education. Circle the letter A, B, C or D to indicate the best option to each of the questions.

Technology is developing, so it has enabled us to do some amazing things. The question is: "What will schools be like in 20 years' time?"

Schools have experienced a **transformation** over the last 80 years - from chalkboards to interactive smart boards and from notebooks to iPads. The concept of a teacher standing at the front facing rows of desks with students who listen and take notes is gradually becoming a thing of the past. Digital classrooms will enable students to take part in learning activities anytime and anywhere. Some people believe that it is only a matter of time before cyborg guides begin to replace teachers in schools. However, it's more likely that robots will be used to support teachers in their work. For instance, robots can be used to make learning activities more individual. This can help to improve a student's learning as it will help students learn in the best way.

Besides, virtual reality headsets will play a bigger role in the schools of the future. As we are in the digital era, a world of information is at your fingertips with a click of a button or a simple voice command. We are moving away from the time when students' schoolbags were full of books. This is the generation of tablets and 3D Digi books, which allows students to interact with 3D objects by touch. What's more, with virtual reality headsets, students may participate in historic scenes or explore the Pyramids of Giza without leaving the classrooms. Everything may be a feature of schools in years to come. However, only time will tell how many of those possibilities will happen in the future.

21. The text is mainly about _____.

- A. how education might change in the future B. the ways cyborgs will help in the future
C. how robots may assist students in learning D. the ways students may use technology

22. The word transformation is CLOSEST in meaning to _____.

- A. creation B. complete change C. improvement D. promotion

23. It's probable that _____.

- A. there will be no more chalkboards in the classrooms
- B. cyborg guides will help teachers
- C. students will learn with cyborg guides individually
- D. cyborg guides will replace teachers

24. 3D Digi books _____.

- A. might be used in history lessons
- B. will be the main source of information
- C. include interactive features
- D. will definitely replace textbooks in class

25. According to the passage, all of the following statements are true, EXCEPT _____.

- A. education has become different over the last 80 years
- B. digital classrooms give students the ability to learn anywhere anytime
- C. nowadays, students can access information easily
- D. students can interact with each other using virtual reality headsets
