II. Read the following text and choose the correct answer to each question.

In 1912, Clarence Birdseye went to live with the Inuit people of the North American Arctic. The Inuit taught him how to fish under the ice. As Birdseye pulled the fish from the water, he put them on the snow and continued fishing. The fish froze almost immediately because of the cold Arctic air.

Birdseye went to eat the fish a few days later. He noticed that they tasted as fresh as the day he caught them. Usually, frozen fish tasted old, and less flavorful. He wondered why the fish tasted better. Maybe it was because of how fast they froze.

Birdseye moved to Massachusetts and began experimenting with freezing food. He developed a new way to freeze it. He blasted the food with air chilled to -43°C . After he developed this method, he founded the General Seafood Corporation. Soon, Birdseye began experimenting with freezing other types of food.

Frozen food was a success! It revolutionized the food industry. Now people could enjoy fresh tasting food at any time of the year. They could even eat food that was packaged far away. Clarence Birdseye has changed the way we eat.

Question 51. Why did the fish freeze almost immediately after being pulled from the water?

- A. Because the Arctic air is cold.

Question 52. How did the frozen fish taste when Birdseye ate them a few days later?

- A. They tasted old and less flavorful.
- C. They tasted awful.

- B. They tasted as good as fresh fish.
D. They tasted more delicious than fresh fish.

Question 53. How has Birdseye changed the way we eat?

- A. We can enjoy fresh tasting food at any time of the year.
B. We can eat more tasty Arctic fish.
C. We can eat fish every day.
D. We can travel to the Arctic to eat fresh fish easily.

Question 54. What does the word “experiment” mean?

- A. to give something to somebody in exchange for money
